MEMORANDUM FOR: Deputy Director for Support

SUBJECT: Establishment of a Position in the
ORD Contract Team for an Industrial
Security Officer

1. This memorandum requests your concurrence; such request is contained in paragraph 5.
2. Having observed the security benefits derived from the team concept of contracting, we completely endorse it. We are convinced that the security yield per professional Security Officer is maximized in the team structure.
3. We, like the Office of Logistics and DD/S&T, are convinced that a full-time professional Security Officer is needed in ORD as a member of the contracting team; that the Area Security Officer assigned to that Office cannot properly perform both security functions. Since we have, however, transferred as many Security slots to other offices as we had allocated to the Industrial Security Support Division, while operating under that concept, we do not concur with DD/S&T or the Office of Logistics in the transfer of another ceiling position. To continue to do this, would place us in a position of staffing other offices in the discharge of their functions for which they have command responsibility.
4. As an alternative, we would propose that the DD/S&T consider making one of their Security Officers available to perform the contract security function in ORD. If this cannot be done, we could select a qualified Officer to fill a DD/S&T slot.

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : Establishment of a Position in the
ORD Contract Team for an
Industrial Security Officer

1. At the time of the initiation of the new contracting team in ORD on 1 March 1969, it was understood that an industrial security officer would be assigned to the team for a 90-day period pending review of the work load to determine if a requirement existed for a permanent security officer in that position. That review has been completed.

**SUBJECT: Establishment of a Position in the
ORD Contract Team for an
Industrial Security Officer**

4. It is patently clear that the above duties cannot be performed by the ORD Area Security Officer. The wide variety of programs carried in ORD require his full-time support. He initiates and monitors the processing of ad hoc, liaison, and contact clearances and monitors the security provisions in effect in ORD toward controlling the flow of between 25 and 75 daily visitors from Government, industry, and colleges and universities. He handles the TALENT [] clearances involving staff and contractor personnel, and provides security guidance for [] projects. He conducts briefings and consultations on safety and security and, in addition, is responsible for ORD physical security.

25X1

5. In view of the experience gained to date and considering the work load involved, this Directorate firmly believes that the industrial security responsibility involved in the support of ORD contracts cannot be met by combining the duties of the ORD Area Security Officer nor can they be met by a temporary or part-time security support arrangement. It is, accordingly, recommended that the Director of Security transfer to the Directorate of Science and Technology one position allocation for an industrial security officer to be assigned full time in direct support of the ORD contracting team. It is further recommended that this position be filled by an experienced industrial security officer.
